Free Self Help Article Manifesting Screen Saver Creation

Follow these instructions to add your **Things Wanted** photos or images saved in the **Special Folder** that you created on your computer to your screen saver and finalize its creation.

Microsoft Windows XP

1. Right click on the desktop click **'Properties'** and then click the **'Screen Saver'** tab within the **'Display Properties'** window. Inside the drop down menu choose the **'My Pictures Slideshow'** option.
2. Click on the **'Settings'** button and make the adjustments, such as picture size (optional). Make sure you set the **'transition effects'** to **'Random.'**
3. Click **'Browse'** to find the folder where your photos or images of things wanted are stored. After the selection click the **'OK'** button and another **'OK'** inside the **'My Pictures Screen Saver Options'** window. Click **'Preview'** to test your screen saver if you want to.
4. The last thing to set up is the **time delay** before your screen saver will activate. Choose **3 minutes** then click the **'Apply'** button, then **'OK'**. Your screen saver will automatically start running after 3 minutes of computer inactivity.

Microsoft Windows 7

1. Right click on the desktop, then click **'personalization'** and then click **'Screen Saver.'** Under where it says **'Screen saver,'** in the drop-down list click **'Photos.'**
2. Click **'Settings'** to open the **'photos screen saver settings'** box, then click **'Browse'** to find the folder where your photos or images of things wanted are stored. Click **'OK.'** Make sure to tick **'Shuffle Pictures'** (it's the same as random.) Set the **'Slide show speed'** to slow, medium or fast.
3. The last thing to set up is the **time delay** before your screen saver will activate. While still in the **'Screen Saver'** window, change the **'Wait'** time to be **3 minutes.** After you've made all your changes, click **'Save.'** Your screen saver will automatically start running after 3 minutes of computer inactivity.

Apple Mac OS X 10.2 and above

1. Select **'System Preferences'** from the Apple menu. Click once on the item **'Screen Effects'** and click on **'Desktop & Screen saver.'** Click the **'Screen saver'** tab.
2. Select the effect **'Pictures Folder'** and browse to the **special folder** you created containing your **Things Wanted** photos and images, then click the **'Options'** button. Check the **'Presents slides in random order'** button.
3. Set any display options you require. Set the **time delay to 3 minutes.** Your screen saver will automatically start running after 3 minutes of computer inactivity.

I couldn't see how to set the **slide show speed,** maybe you can do this by using **iPhoto?**

When finished, return to [Free Self Help Article](#) to learn how your screensaver works.
